

What is claimed is:

1. An LCD panel fixing structure for fixing and holding an LCD panel, comprising:

a first holding member, which holds said LCD panel;

5 and

a second holding member, which holds said LCD panel, wherein a peripheral edge part of said LCD panel being housed within a depression part formed between said first and second holding members and being elastically fixed and held in said depression part.

2. An LCD panel fixing structure according to claim 1, wherein said depression part which holds said LCD panel is provided in only one of said first holding member and said second holding member.

15 3. An LCD panel fixing structure according to claim 1, wherein said depression part which holds said LCD panel is provided in both said first holding member and said second holding member.

4. An LCD panel fixing structure according to claim 1, wherein said second holding member is frame like shaped, and comprises a depression part in a peripheral edge part thereof for housing a peripheral edge part of said LCD panel.

5. An LCD panel fixing structure according to claim 1, wherein at least one of said first and second holding members having a structure that does not cause said LCD panel to deform, even when subjected to pressure.

6. An LCD panel fixing structure according to claim 1, wherein a depression part and surrounding part of at

least one of said first and second holding members are formed of an elastically deformable elastic member.

7. An LCD panel fixing structure according to claim, wherein all of at least one of said first and second
5 holding members is formed of an elastically deformable elastic member.

8. An LCD panel fixing structure according to claim, wherein the depression part regions and surrounding part thereof in both said first and second holding members are
10 made of an elastically deformable elastic member.

9. An LCD panel fixing structure according to claim 1, wherein all of both said first and second holding members are made of an elastically deformable elastic member.

10. An LCD panel fixing structure according to claim 1,
15 wherein said first and second holding members are fixed to each other with a holding member except for a screw member.
